

GTRAFT

Reliable Automated File Transfer,
wherever you are

GTRAFT

GTRAFT is a best in class data synchronisation application that allows IT managers to configure, monitor and execute simultaneous file transfer tasks from a central location. Utilising its powerful scheduler, tasks can run automatically with no human intervention.

At its core **GTRAFT** provides a solution to transfer data between the ship and shore reducing time and administration required by IT which ultimately can lead to lower costs.

🗨️ **GTRAFT** not only allows us to manage & monitor a wide range of tasks, it also allows us to implement new ones, giving us **full control** without any crew intervention. 🗨️

Athanassios Vappas, I.T Superintendent, TMS Group

Why GTRAFT?

GTRAFT allows for the automation of a range of tasks including data file transfer, remote folder synchronisation and system monitoring & setting. All tasks can be controlled centrally, removing the need for input from the crew.

Benefits of GTRAFT

- ✓ **Central control and management from shore** - manage the fleet from shore with no need for crew intervention. Ability to assign single job to multiple vessels
- ✓ **Flexible & scalable** - simple and easy to adapt to your business requirements
- ✓ **Performance** - built-in resilience to volatile and unstable satellite communication networks; high data compression
- ✓ **Email system agnostic** - works with any email system
- ✓ **Comprehensive reporting and journaling** - remotely monitor job status from shore
- ✓ **No limitations on size or file format** - transfer anything from documents, reports, eforms, applications and automation scripts with no restrictions on file size
- ✓ **Automation & bi-directional transfer** - configure once and the system can report tasks, transferring files from ship to shore and shore to ship
