

LiteSpeed VSAT

A secure, reliable and unlimited
communications package

LiteSpeed VSAT

As ships become more connected, the seafarers who work on them become more digitally savvy, particularly digital natives, who are likely to be trained on new technologies and expect continuous, global connectivity. Reports show that **92 percent of seafarers consider internet access as a strong influence on their decision of where to work**. This makes high-quality connectivity a key requirement for ship owners looking to attract and retain qualified crew who want to be able to connect with family and friends while at sea.

LiteSpeed VSAT has been designed to meet the challenges ship owners are facing today and, in the future, helping shipping companies achieve their digital requirements in the simplest and most cost-effective way.

Operating using the SES Skala global network, **LiteSpeed VSAT** direct provides high quality broadband, supported by a network of satellites to deliver a guaranteed quality of service (QoS) with reliable and resilient connectivity. 24 / 7 support is also provided as standard from **GTMaritime's** support team.

With no long-term commitments **LiteSpeed VSAT** provides flexibility and scalability, giving businesses the ability to increase bandwidth as required.

A FULLY SECURE COMMUNICATIONS PACKAGE

FREE GTSEMAIL

A secure, stable and lightweight compression email platform, specifically developed for smaller vessels. Supports maximum bandwidth optimisation and delivers advanced cyber security functionality, including zero-day threat protection.

LOCALISATION AVAILABLE

GTSeaMail is available in several languages to suit the requirements of your crews. We are also able to translate if the language you require is not currently available*

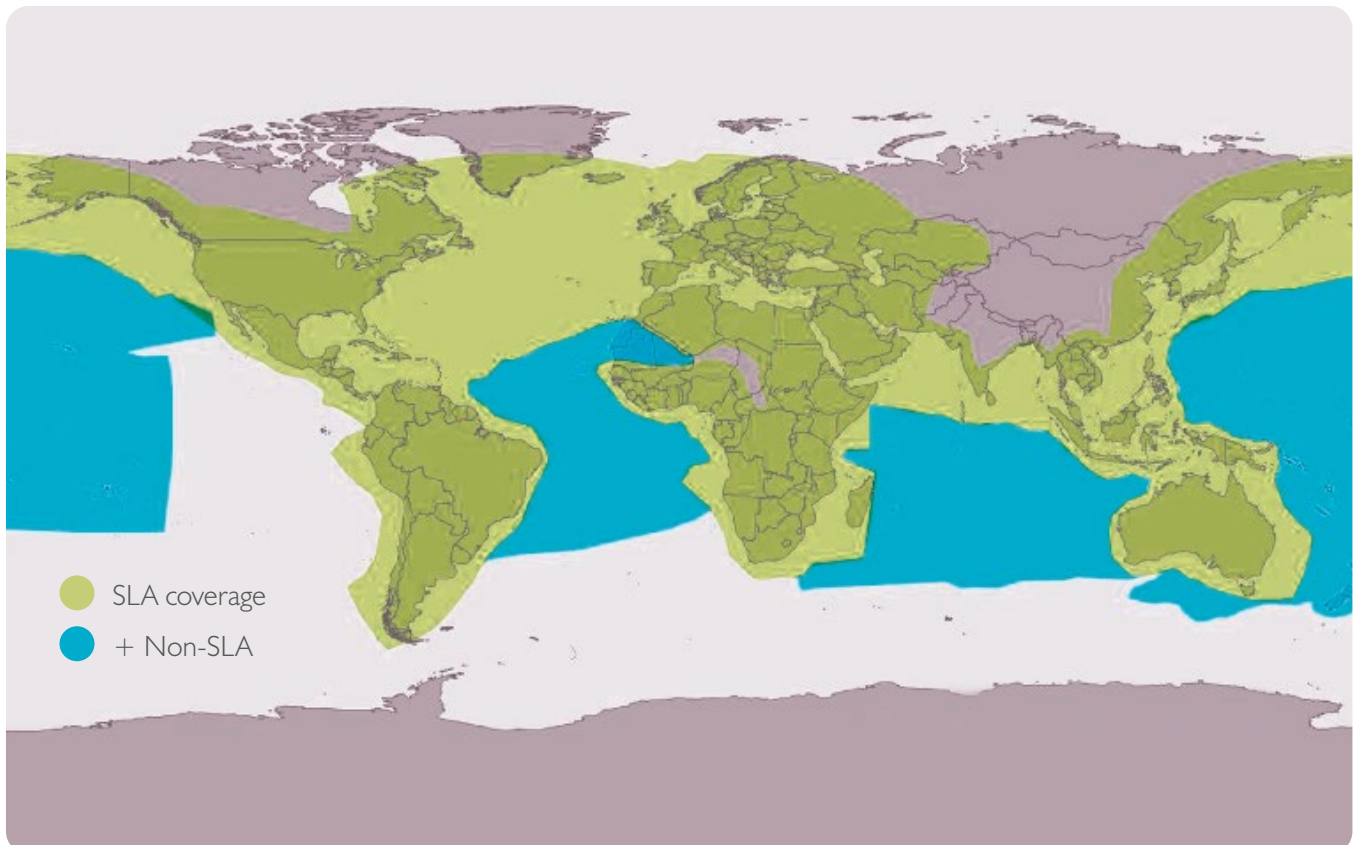

*Based on number of vessels.

GTSENTINEL PROVIDED AS STANDARD

A comprehensive antivirus solution, optimised for the maritime market and designed to protect the vessel whilst minimising the impact on communication network included **free of charge**, for the primary workstation, to ensure complete security.**

**Primary email workstation is classified as the device operating GTSeaMail.

GLOBAL COVERAGE

BENEFITS OF LITESPEED VSAT

- ✓ Fully managed, low latency, GEO HTS connectivity
