GTMailPlus.eNOAD

Saving you **TIME**. Saving you **MONEY**.
Providing **SECURITY**.

GTMailPlus.eNOAD is GTMaritime's software solution for the submission of electronic Notice of Arrival/Departure (NOA/D) forms to the United States Coast Guard National Vessel Movement Centre (USCG NVMC).

Fully approved and compliant with the arrival and departure notification requirements of the USCG and Customs and Border Protection (CBP), GTMailPlus.eNOAD ensures submissions can be made in a simple, timely manner and with minimal data transmission costs.

Saving you **TIME**

✔ **Decreasing administration time**

- Intuitive form layout with information requirements separated into specific categories
- Form filters are provided to simplify form selection by drop-down lists
- Data is validated when the document is saved

✔ **Previous form re-use**

- Previously submitted forms can be used as a template
- Partially completed forms can be saved as a draft, removing the need to complete the form in one session

✔ **User-friendly dashboard**

- Following the completion of an eNOAD form, it is then sent to the NVMC. This form will be listed in the **GTMaritime** dashboard and marked as 'Submitted'
- Once transferred to the NVMC, further status updates are displayed on the **GTeNOADPlus** dashboard advising of the forms progress

Saving you **MONEY**

✔ **Minimise transmission time and cost**

- The **GTMailPlus.eNOAD** software is optimised. This means only the data within the form is submitted, without the form itself, saving time and cost

✔ **No need to be online**

- Whilst many commercially available offerings can only be edited online, **GTMailPlus.eNOAD** can be completed offline and only requires an internet connection when ready to submit

Providing **SECURITY**

✔ **Fully secure**

- Stored form data is encrypted and only viewable in the **GTMailPlus.eNOAD** application

Specialist support included.
