GTMailPlus.Locator

Allows for current and historic position of vessels to be viewed.

Using the GPS position of the ship when **GTMailPlus** connects to the hub, you can view the position of vessels on the **GTMaritime** dashboard.

Visible at both fleet and vessel level, **GTMailPlus.Locator** allows for the position of the vessels to be viewed at any point over the previous 31 day period.

Why do I need GTMailPlus.Locator?

GTMailPlus.Locator allows for the current position and the route of the vessel to be viewed via the **GTMaritime** dashboard and allows for the data to be exported to a structured report.

Benefits of Locator

✔ **Self Service** - Ability to view the position of the vessel or fleet via the GTMaritime dashboard at any time

✔ **Ability to configure** - View the location of vessel on specific date / time period within the past 31 days

✔ **Reporting** - Export a report to view all the GPS positions within a set time period. Data is also accessible via an API

How GTMailPlus.Locator works

GTMaritime Dashboard
