

GTMailPlus. Spam Management

Ensure that vessels are protected whilst allowing business emails to reach their destination

GTMaritime have always been committed to ensuring your vessels are protected from spam. With **GTMailPlus** all emails pass through multiple layers of security. **GTMailPlus.Spam Management** allows customers to view what messages are being quarantined and change their filter levels to suit their needs.

Why do I need Spam Management?

At installation all messages using GTMailPlus pass through GTMaritime's default settings to automatically protect from spam. Through the GTMaritime dashboard customers are able to view what messages have been quarantined and release them if appropriate. Customers can then increase or decrease their settings based on their requirements. This ensures that vessels are protected from spam whilst allowing business emails to reach their destination.

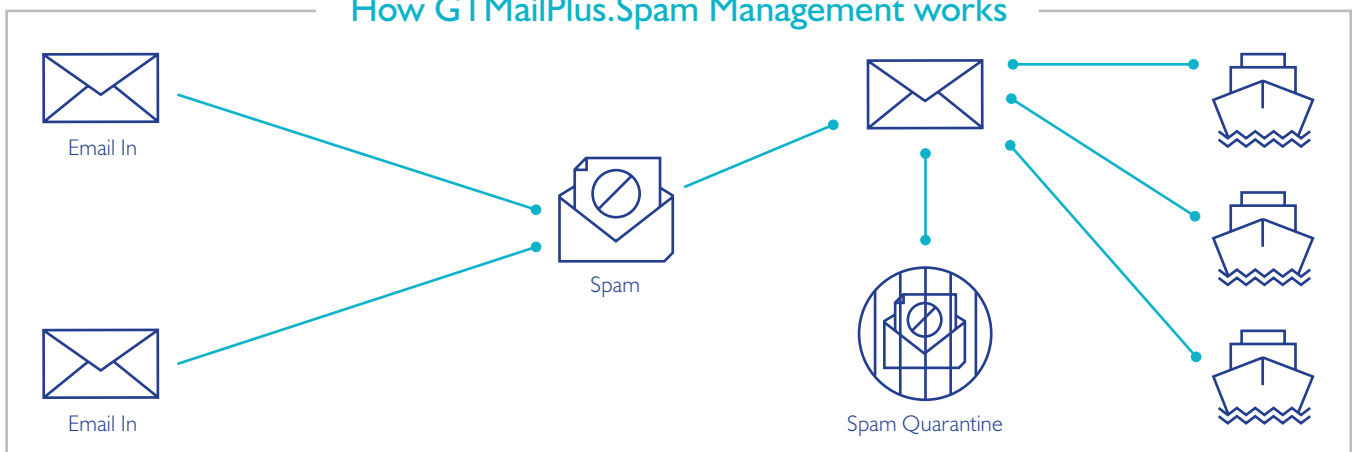

“ **53.5% of email worldwide is spam** ”

www.statista.com,
September 2018

Benefits of GTMailPlus.Spam Management

- ✓ **Self Service** - have the ability to access blocked message and view/release as required
