

- Over 20 years maritime communications experience
- 24/7 365 technical support from ITIL trained engineers
- Offices in the UK and Singapore along with a global partner network
- Personally tailored, individual approach to our customers
- Independent software can be used via any communication system

Solutions & Services

GTRAFT

Reliable Automated File Transfer, wherever you are

GTRRAFT

Reliable Automated File Transfer,
wherever you are

GTRRAFT is a best in class data synchronisation application that allows IT managers to configure, monitor and execute simultaneous file transfer tasks from a central location. Utilising its powerful scheduler, tasks can run automatically with no human intervention.

At its core **GTRRAFT** provides a solution to transfer data between the ship and shore reducing time and administration required by IT which ultimately can lead to lower costs.

Why GTRRAFT?

GTRRAFT allows for the automation of a range of tasks including data file transfer, remote folder synchronisation and system monitoring & setting. All tasks can be controlled centrally, removing the need for input from the crew.

“**GTRRAFT** not only allows us to manage and monitor a wide range of tasks, it also allows us to implement new ones, giving us **full control** without any crew intervention.”

Athanasios Vappas,
I.T Superintendent, TMS Group

Benefits of GTRRAFT

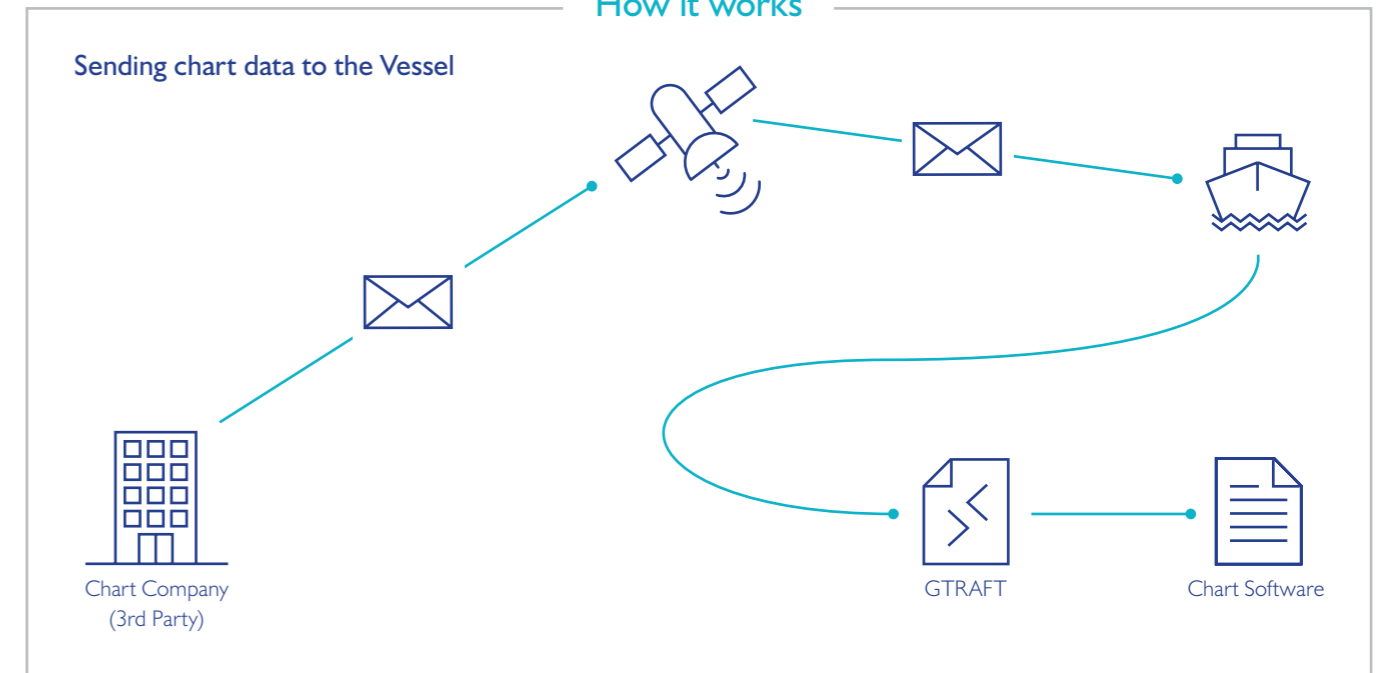

- ✓ **Central control and management from shore** - manage the fleet from shore with no need for crew intervention. Ability to assign single job to multiple vessels
- ✓ **Flexible & scalable** - simple and easy to adapt to your business requirements
- ✓ **Performance** - built-in resilience to volatile and unstable satellite communication networks; high data compression
- ✓ **Email system agnostic** - works with any email system
- ✓ **Comprehensive reporting and journaling** - remotely monitor job status from shore
- ✓ **No limitations on size or file format** - transfer anything from documents, reports, eforms, applications and automation scripts with no restrictions on file size
- ✓ **Automation & bi-directional transfer** - configure once and the system can report tasks, transferring files from ship to shore and shore to ship
