GTMailPlus

Integrating Ship and Shore; securely and efficiently

As companies aim to build improved integration between their vessel and shore operations, they are adopting solutions not optimised for maritime. However, these solutions are not developed to cope with the challenges of the hostile maritime environment and various satellite communications configurations which can also compromise the level of security needed.

GTMailPlus allows for integration with solutions such as Microsoft365, GMail, Mimecast and more, whilst providing the stability, security and optimisation your vessels require.

Integrate your vessel and office with GTMailPlus

GTMailPlus is a secure, reliable, cloud-based service which enables essential business communications in an optimised manner. The web dashboard allows for the remote configuration and administration of vessels and is both airtime and hardware independent.

By integrating GTMailPlus with your office mail platform, you can benefit from:

Unifying your company communications

High levels of compression to reduce your data overhead

Enterprise grade security included as standard to keep malicious content away from your vessels

Encrypted communications

Efficiently work over various backup satcom systems

GTMailPlus also allows you to use your company branded domain name onboard.

Benefits of integrating with GTMailPlus

GTMailPlus is optimised for use on volatile connections which allows for point of interruption failure. This means if a connection was to fail mid transfer, the data will pick up where it left off, whereas non-maritime solutions will retransmit resulting in delays and increased bandwidth being used to retransmit packets

Fully managed infrastructure provided by **GTMaritime**

GTMailPlus includes a suite of valuable applications optimised for the maritime industry

Local vessel email server – can still communicate internally whilst offline

Unlimited mailboxes with **GTMailPlus** compared with per user pricing on Microsoft365 and other solutions

Fleet management and reporting from a centrally managed portal

Non-maritime email products result in higher connectivity costs and delays when used on backup connections

Lower bandwidth required compared to non-maritime email as a stand-alone solution

GTMailPlus only uses bandwidth during the duration of a data transfer connection unlike Microsoft365 and other solutions which uses bandwidth in an idle state

Benefits of being a GTMaritime Customer

24/7 technical support from ITIL trained engineers **365 days a year.**

Free Compliance Maintenance Solution to ensure your GTMaritime software is automatically up to date; and IMO 2021 Cybersecurity guideline compliant across your fleet.

Fleetwide management dashboard allowing for remote configuration and administration of vessels. Option to customise with own brand.

Access to Knowledge Base; receive immediate access to help resolve any questions you may have, in addition to our dedicated support team who are available 24 hours a day.
