

GTMailPlus Cloud Access

Email Access Anywhere

Stay connected to your business with GTMailPlus' new cloud access feature, now available as standard. Whether onshore or offshore, you can access your emails from anywhere, even if your onboard systems are offline. Enjoy seamless, real-time synchronization between vessel and shore, ensuring uninterrupted communication across your operations.

Why Cloud Access?

In today's digital world, maintaining email access during downtime is crucial for keeping your business running. With GTMailPlus Cloud Access, you can stay connected from any device, even during system outages, ensuring smooth operations both on and off the vessel.

In fact, a recent Uptime Institute report revealed that 35% of businesses experienced outages lasting more than 8 hours in the last five years, with 54% reporting their most recent outage cost over \$100,000.

GTMailPlus Cloud Access

Email Access Anywhere

GTMailPlus Cloud Access is a secure, webmail-based service hosted within GTMaritime's cloud infrastructure, with customizable storage aligned to your archiving settings.

Benefits of GTMailPlus Cloud Access:

Cost-effective: No additional hardware or software required.

Reliable backup: Always have access to your emails without needing extra backup solutions.

Global accessibility: Access emails from any device—desktop, tablet, or mobile—from anywhere in the world.

Effortless management: The look and feel of the email application will be the same online as it is onboard. No additional administrative overhead, saving you time and resources.

Disaster recovery-ready: Continue business operations smoothly, even during system downtime, with access to both live and historical emails.

Real-time synchronization: The inbox folder structure and read/unread messages will be the same for both online and onboard

User-friendly: Simple webmail access via your existing credentials, anytime, anywhere.
