

GT Sentinel

World-class antivirus protection
for the maritime industry

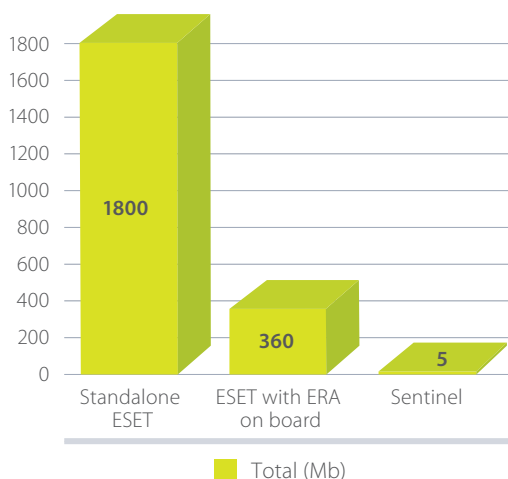

GT Sentinel is a comprehensive antivirus solution, optimised for the maritime market and designed to protect the vessel whilst minimising the impact on low bandwidth networks. **GT Sentinel** utilises the industry leading, well respected endpoint antivirus solution from ESET.

Viruses can attack any day, any time. **GT Sentinel** now provides **live and daily virus definition updates** meaning that vessels will get the updates as soon as they are available, helping reduce the threat to business, without incurring large data costs.

GT Sentinel data usage will remain the same regardless of if you have 5 or 50 clients on board.

Data usage example is based on having 5 clients on board a vessel receiving live updates.

Data savings with GT Sentinel

Benefits of GT Sentinel

GT Sentinel has been optimised specifically for the maritime market and the new updated version provides the following benefits;

- ✓ **Zero Day Protection** - use of live updates allowing you to receive the protection as soon as ESET release signature updates
- ✓ **Threat Reporting** - ability to receive a digest of threats found by **GT Sentinel**
- ✓ **Official Support and alerts for Server Editions** - fileservers work differently to traditional endpoint operating systems and require software tailored to the job
- ✓ **Flexible Signature Updates** - offering daily, weekly or on demand update downloads
- ✓ **Robust Update Mechanism** - delivers reliable updates in challenging conditions
- ✓ **Remote Automated Log Retrieval** - no longer have to liaise with the vessel for log retrieval reducing support time

Partnership with ESET

In addition to the maritime specific benefits delivered by **GT Sentinel**, in working in partnership with ESET, **GT Maritime** provides the following new features;

- ✓ **Additional Anti-Phishing protection** - protects from attempts to acquire your password and other sensitive information
- ✓ **ESET Shared Local Cache** - allows improved performance in virtualised settings
- ✓ **Native 64bit Scanning Feature** - reduces the system footprint and allows for efficient scans
- ✓ **Botnet Protection (EES only)** - helps discover malware by analysing network communication patterns
- ✓ **Web Threat Detection Feature** - for threats caused by browser vulnerabilities

All the new features above are delivered along with the standard features of **GT Sentinel** including remote management, simple install, advanced memory scanner and world-class protection.
